

Emergency Dengue Investigation Record

AI Medical Investigation Intelligence - Sample Evidence File

Record No	ETU-KDY-2026-018
Patient Name	S. Lakmali Fernando
Age / Gender	28 / Female
Date	04 Feb 2026
Hospital / Location	Kandy Teaching Hospital
Medical Condition	Dengue Fever with Warning Signs
Severity Level	Critical

Lab / Test Results

Test Name	Result	Reference / Comment
Platelet Count	42,000 /uL	Very low
White Blood Cell Count	3,200 /uL	Low
Dengue NS1 Antigen	Positive	Confirmed marker
Hematocrit	Increased	Warning sign
Temperature	39.5 C	High fever

Clinical Findings

High fever for 4 days, severe body pain, vomiting, low platelet count, mild abdominal pain, and dizziness were reported.

Doctor Notes

Patient must be monitored closely due to low platelet count and dengue warning signs. Fluid balance chart should be maintained. Immediate admission is recommended.

Summary

Critical dengue investigation case detected at Kandy Teaching Hospital with positive NS1 antigen and low platelet count.

Synthetic sample record only - no real patient data.
