

Renal Function Investigation Report

AI Medical Investigation Intelligence - Sample Evidence File

Investigation No	RF-JFN-2026-089
Patient Name	Tharshan Rajendran
Age / Gender	61 / Male
Date	09 May 2026
Hospital / Location	Jaffna Teaching Hospital
Medical Condition	Chronic Kidney Disease
Severity Level	High

Lab / Test Results

Test Name	Result	Reference / Comment
Serum Creatinine	3.1 mg/dL	High
Blood Urea	68 mg/dL	High
eGFR	28 mL/min/1.73m2	Reduced
Urine Protein	Positive	Abnormal
Potassium	5.4 mmol/L	Mildly high

Doctor Notes

Renal function is significantly reduced. Patient has a history of hypertension and diabetes. Nephrology referral is recommended. Medication review is required to avoid kidney-toxic drugs.

Summary

High severity chronic kidney disease investigation with abnormal renal function results and reduced eGFR.

Recommended Action

Schedule nephrology review, monitor potassium, repeat renal profile, and assess long-term kidney care plan.

Synthetic sample record only - no real patient data.
